DETAILED ACTION

Allowable Subject Matter

1. Claims 1 and 4-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's arguments filed on October 9, 2003 are persuasive. Specifically as argued by Applicant "the configurations shown by Kapgan would not be applicable to connecting casing strings within a wellbore. Kapgan suggests a coupling device, 1, be placed around the ends of the pipes to be connected. The outside of a casing secured in a formation, according to the present invention, would not be accessible for placement of the coupling device according to Kapgan. Further, the shape-memory material of the present invention is used, according to the present specification, page 4, lines 22-28, to improve the seal between the two casing sections. The purpose of the shape-memory alloy of Kapgan is to force the two pipes together. There would be no reason to use the shape-memory of the Kapgan in the connections of over Kozubovski and Gabor because the pipes are forced together by the explosive compression waves in Kozubovski and Gabor. There is therefore no suggestion to combine these referenced to obtain the present invention". Since no prior art of record teaches using a shape-memory material to improve seal between casing sections in combination with the rest of the limitations in the claim, the claims are found to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
